KEY-WORD INDEX

A

ACE inhibitor — Pharmacokinetics of perindopril and its metabolites in healthy volunteers, 175

Acetaminophen — Influence of acetaminophen on antipyrine kinetics in rats, 79

Adenosine — Inhibition by chlordiazepoxide of adenosine-stimulated glucagon secretion, 201

Adrenergic neurotransmission — Effects of CRL 41034 on the adrenergic neuroeffector interaction in the canine saphenous vein, 525

Adrenoceptors — Pharmacology of noradrenaline and neuropeptide tyrosine (NPY)-mediated sympathetic cotransmission, 373

[α-Adrenoceptors, β-Adrenoceptors] — Whether phenylephrine exerts inotropic effects through α- or β-adrenoceptors depends upon the relative receptor populations, 25

Aging — Pyroglutamic acid improves the age associated memory impairment, 169

Agonists — Selective agonists of tachykinin binding sites, 257

Alcohol — Effects of Jian Bu Wan – a traditional Chinese medication on behavioral and cardiovascular parameters after acute alcohol intake in normal subjects, 11 — The pharmacokinetics of the antidepressant tianeptine and its main metabolite in healthy humans — influence of alcohol co-administration, 115

Alprazolam — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

Analgesia — Action of neurotropin on cold-induced pain in normal volunteers: a double-blind placebo study, 141

Anterior lobe — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307

Antiarrhythmic drugs — Investigations of the antifibrillatory activity of flunarizine and lidoflazine in isolated hearts of rabbits and guinea pigs, 503

Antipyrine — Influence of acetaminophen on antipyrine kinetics in rats, 79

Anti sense oligonucleotides — Perspectives in antiviral chemotherapy, 357

Antiviral drugs — Perspectives in antiviral chemotherapy, 357

Apomorphine — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49 — Effect of bromocriptine on neurogenic vasoconstriction in the isolated autoperfused hindquarters of the rat, 539

Appetite stimulant — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191

Arterial distensibility — Influence of diuretics on brachial artery diameter and distensibility in hypertensive patients, 685

Atria — Whether phenylephrine exerts inotropic effects through α- or β-adrenoceptors depends upon the relative receptor populations, 25

Atrial natriuretic peptides — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129

Autoperfused rat hindquarters — Effect of bromocriptine on neurogenic vasoconstriction in the isolated autoperfused hindquarters of the rat, 539

B

Behavioural despair — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49

Benzodiazepines — Inhibition by chlordiazepoxide of adenosine-stimulated glucagon secretion, 201 — Pharmacokinetics of flunitrazepam following single dose oral administration in liver disease patients compared with healthy volunteers, 643

Binding — Kinetic analysis of the binding of nomegestrol acetate to the progesterone receptors in rat uterus by competition studies, 511

Binding sites — Selective agonists of tachykinin binding sites, 257
Bioavailability — The pharmacokinetics of the antidepressant tianeptine and its main metabolite in healthy humans — influence of alcohol co-administration, 115
Blood–brain barrier — How chronically administered valproate increases chlordiazepoxide transfer through the blood–brain barrier, 105
Blood level-effect correlation — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673
Blood pressure — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129
Brachial artery diameter — Influence of diuretics on brachial artery diameter and distensibility in hypertensive patients, 685
Brain monoamines — Interaction of cholecystokinin and diazepam: effects on brain monoamines, 245
Bromocriptine — Effect of bromocriptine on neurogenic vasoconstriction in the isolated autoperfused hindquarters of the rat, 539 — Randomized double-blind trial of injectable heptaminol for controlling spontaneous of bromocriptine-induced orthostatic hypotension in parkinsonians, 695
Bronchial hyperreactivity — Failure of aerosolized endothelin (ET-1) to induce bronchial hyperreactivity in the guinea pig, 275
Buflomedil — Effects of CRL 41034 on the adrenergic neuroeffector interaction in the canine saphenous vein, 525
Bufuralol — Genetic polymorphisms of drug metabolism, 595
Bupivacaine — Bupivacaine free plasma levels in children after caudal anaesthesia: influence of pretreatment with diazepam? 159

C

Caffeine pharmacokinetics — Effect of hypophysectomy on caffeine elimination in rats, 393
Calcium antagonists — Investigations of the antifibrillatory activity of flunarizine and lidoflazine in isolated hearts of rabbits and guinea pigs, 503
Calcium channel blocker — Cardiovascular properties of LF 2.0254, a new potent vasoselective calcium channel blocker with a slow onset of action, 223
Cardiovascular control — Pharmacology of noradrenaline and neuropeptide tyrosine (NPY)-mediated sympathetic cotransmission, 373
Cardiovascular symptoms — Effects of Jian Bu Wan – a traditional Chinese medication on behavioral and cardiovascular parameters after acute alcohol intake in normal subjects, 11
DL Carnitine — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191
Caudal anaesthesia — Bupivacaine free plasma levels in children after caudal anaesthesia: influence of pretreatment with diazepam? 159
Central nervous system — Physiological basis for neuroimmunomodulation, 281
Cerebrospinal fluid (CSF) — Determination of cerebrospinal fluid production rate using a push-pull perfusion procedure in the conscious rat, 269
Chinese medication — Effects of Jian Bu Wan — a traditional Chinese medication on behavioral and cardiovascular parameters after acute alcohol intake in normal subjects, 11
Chiral inversion — Pharmacological aspects of chiral nonsteroidal anti-inflammatory drugs, 617
Chlordiazepoxide — How chronically administered valproate increases chlordiazepoxide transfer through the blood–brain barrier, 105 — Inhibition by chlordiazepoxide of adenosine-stimulated glucagon secretion, 201
Cholecystokinin octapeptide — Interaction of cholecystokinin and diazepam: effects on brain monoamines, 245
Chronic urticaria — Mechanism of action of doxepin in the treatment of chronic urticaria, 147
Clinical pharmacokinetics–prostaglandins — Pharmacological aspects of chiral nonsteroidal anti-inflammatory drugs, 617
Cold-induced pain — Action of neurotropin on cold-induced pain in normal volunteers: a double-blind placebo study, 141
Colonic temperature — Effects induced by chronic treatment with selective D_1 or D_2 antagonists on open-field behavior and colonic temperature, 341

Conscious dog — Hemodynamic and cardiac effects of spiraprilat in normal and sodium depleted conscious dogs, 547

Conscious rat — Determination of cerebrospinal fluid production rate using a push-pull perfusion procedure in the conscious rat, 269

Converting enzyme inhibitor — Hemodynamic and cardiac effects of spiraprilat in normal and sodium depleted conscious dogs, 547

CY 216 — Pharmacodynamics of CY 216 in healthy volunteers: inter-individual variations, 17

Cycloxygenase — Pharmacological aspects of chiral nonsteroidal anti-inflammatory drugs, 617

Cyproheptadine — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191

Cytotoxicity — Perspectives in antiviral chemotherapy, 357

D

D_1-D_2 interactions — Effects induced by chronic treatment with selective D_1 or D_2 antagonists on open-field behaior and colonic temperature, 341

Debrisoquine — Genetic polymorphisms of drug metabolism, 595

Dextromoramide — Tissue distribution of dextromoramide in the rat, 163

Dextronatrin — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129

Diazepam — Bupivacaine free plasma levels in children after caudal anaesthesia: influence of pretreatment with diazepam? 159 — Interaction of cholecystokinin and diazepam: effects on brain monoamines, 245 — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

Diazepam–bupivacaine interactions — Bupivacaine free plasma levels in children after caudal anaesthesia: influence of pretreatment with diazepam? 159

3,4-Dihydroxyphenylacetic acid (DOPAC) — Time-related changes in serum perphenazine, striatal ^{3}H-spiperone binding and regional brain acid metabolites of dopamine and 5-hydroxy-tryptamine after a single dose of perphenazine, 213

Dimethindene maleate — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673

Diuretics — Influence of diuretics on brachial artery diameter and distensibility in hypertensive patients, 685

DL Carnitine — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191

Dopamine — Electrotherapy in mice: dopaminergic and noradrenergic effects in the Tail Suspension Test, 39 — Interaction of cholecystokinin and diazepam: effects on brain monoamines, 245 — Effects induced by chronic treatment with selective D_1 or D_2 antagonists on open-field behavior and colonic temperature, 341

Dopamine receptors — Effect of bromocriptine on neurogenic vasoconstriction in the isolated autoperfused hindquarters of the rat, 539

Doxepin — Mechanism of action of doxepin in the treatment of chronic urticaria, 147

Drug interactions — Influence of acetaminophen on antipyrine kinetics in rats, 79

Drug metabolism — Influence of acetaminophen on antipyrine kinetics in rats, 79 — Genetic polymorphisms of drug metabolism, 595

Drug-resistance — Perspectives in antiviral chemotherapy, 357

E

EEG — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

Effect-kinetic behaviour — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673

Electrotherapy (ECT) — Electrotherapy in mice: dopaminergic and noradrenergic effects in the Tail Suspension Test, 39

Enantiomers — Pharmacological aspects of chiral nonsteroidal anti-inflammatory drugs, 617

Endothelin — Failure of aerosolized endothelin (ET-1) to induce bronchial hyperreactivity in the guinea pig, 275

Essential hypertension — Influence of diuretics on brachial artery diameter and

distensibility in hypertensive patients, 685

Ethanol intake — Alcohol and GABA: ethanol intake modifies hippocampal nipecotic acid binding in ethanol-preferring and non-preferring rats, 491

F

Flunarizine — Investigations of the antifibrillatory activity of flunarizine and lidoflazine in isolated hearts of rabbits and guinea pigs, 503

Flunitrazepam — Pharmacokinetics of flunitrazepam following single dose oral administration in liver disease patients compared with healthy volunteers, 643

Free bupivacaine — Bupivacaine free plasma levels in children after caudal anaesthesia: influence of pretreatment with diazepam? 159

Free radicals — Oxygen-derived free radicals and postischemic myocardial reperfusion: therapeutic implications, 85

G

GABA — Alcohol and GABA: ethanol intake modifies hippocampal nipecotic acid binding in ethanol-preferring and non-preferring rats, 491

Gastrointestinal symptoms — Effects of Jian Bu Wan – a traditional Chinese medication on behavioral and cardiovascular parameters after acute alcohol intake in normal subjects, 11

Genetic polymorphism — Genetic polymorphisms of drug metabolism, 595

Glucagon secretion — Inhibition by chlordiazepoxide of adenosine-stimulated glucagon secretion, 201

Gonadotropin-releasing hormone (LHRH) — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307

Guinea pig — Failure of aerosolized endothelin (ET-1) to induce bronchial hyperreactivity in the guinea pig, 275

H

Haemodialysis clearance — Tianeptine and its main metabolite. Disposition in chronic renal failure and haemodialysis, 663

Haemodynamics — Cardiovascular properties of LF 2.0254, a new potent vasoselective calcium channel blocker with a slow onset of action, 223

Healthy subjects — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673

Healthy volunteers — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191

Hematocrit — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129

Hemodynamic effects — Hemodynamic and cardiac effects of spiraprilat in normal and sodium depleted conscious dogs, 547

Heptaminol — Randomized double-blind trial of injectable heptaminol for controlling spontaneous or bromocriptine-induced orthostatic hypotension in parkinsonians, 695

Herpes virus — Perspectives in antiviral chemotherapy, 357

Hippocampus — Alcohol and GABA: ethanol intake modifies hippocampal nipecotic acid binding in ethanol-preferring and non-preferring rats, 491

Histamine provocation — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673

HIV — Perspectives in antiviral chemotherapy, 357

Human liver — Genetic polymorphisms of drug metabolism, 595

Human pharmacokinetics — Pharmacokinetics of perindopril and its metabolites in healthy volunteers, 175

Human subjects — Action of neurotropin on cold-induced pain in normal volunteers: a double-blind placebo study, 141

5-Hydroxyindoleacetic acid (5-HIAA) — Time-related changes in serum perphenazine, striatal ^{3}H-spiperone binding and regional brain acid metabolites of dopamine and 5-hydroxy-tryptamine after a single dose of perphenazine, 213

5-Hydroxytryptamine — Interaction of cholecystokinin and diazepam: effects on brain monoamines, 245

5-Hydroxytryptamine uptake sites — Reduction of [^{3}H]6-Nitroquipazine-labelled 5-hydroxytryptamine uptake sites in rat brain by 3,4-Methylenedioxymethamphetamine, 635

Hypophysectomy — Effect of hypophysectomy on caffeine elimination in rats, 393

I

Immune system — Physiological basis for neuroimmunomodulation, 281
Immunocytochemistry — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307
Immunomodulating — Physiological basis for neuroimmunomodulation, 281
Influenza A virus — Perspectives in antiviral chemotherapy, 357
Intermediate lobe — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307
Intracutaneous injection — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673
In vitro — Cardiovascular properties of LF 2.0254, a new potent vasoselective calcium channel blocker with a slow onset of action, 223
Inulin — Determination of cerebrospinal fluid production rate using a push-pull perfusion procedure in the conscious rat, 269
Ischemia — Oxygen-derived free radicals and postischemic myocardial reperfusion: therapeutic implications, 85
Isoniazid — Genetic polymorphisms of drug metabolism, 595

K

Ketotifen — Inhibition of human and rabbit platelet activation by Ketotifen, 1
Kinetics — The pharmacokinetics of the antidepressant tianeptine and its main metabolite in healthy humans — influence of alcohol co-administration, 115

L

Latency — Perspectives in antiviral chemotherapy, 357
Lateral ventricle — Determination of cerebrospinal fluid production rate using a push-pull perfusion procedure in the conscious rat, 269
Latin-square design — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191
Leukotrienes — Effects of low concentrations of arachidonic acid derived mediators on the membrane potential and respiratory burst responses of human neutrophils as assessed by flow cytometry, 65
LF 2.0254 — Cardiovascular properties of LF 2.0254, a new potent vasoselective calcium channel blocker with a slow onset of action, 223
Lidoflazine — Investigations of the antifibrillatory activity of flunarizine and lidoflazine in isolated hearts of rabbits and guinea pigs, 503
Liver disease — Pharmacokinetics of flunitrazepam following single dose oral administration in liver disease patients compared with healthy volunteers, 643
Low molecular weight heparins — Pharmacodynamics of CY 216 in healthy volunteers: inter-individual variations, 17
Luteinizing hormone — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307

M

Melanocyte-stimulating hormone (α-MSH) — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307
Membrane potential — Effects of low concentrations of arachidonic acid derived mediators on the membrane potential and respiratory burst responses of human neutrophils as assessed by flow cytometry, 65
Memory deficits — Pyroglutamic acid improves the age associated memory impairment, 169
Mephenytoin — Genetic polymorphisms of drug metabolism, 595
Metabolism — Tissue distribution of dextromoramide in the rat, 163
Metabolite — Tianeptine and its main metabolite. Disposition in chronic renal failure and haemodialysis, 663
3-Methoxy, 4-hydroxyphenylacetic acid (HVA) — Time-related changes in serum perphenazine, striatal ^{3}H-spiperone binding and regional brain acid metabolites of dopamine and 5-hydroxy-tryptamine after a single dose

of perphenazine, 213

3,4-Methylenedioxymethamphetamine — Reduction of [^{3}H]6-Nitroquipazine-labelled 5-hydroxytryptamine uptake sites in rat brain by 3,4-Methylenedioxymethamphetamine, 635

Mood — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

MRT — Effect-kinetic characterization of dimethindene maleate following oral administration (Fenistil, Tropfen), 673

Myocardial sturring — Oxygen-derived free radicals and postischemic myocardial reperfusion: therapeutic implications, 85

N

Natriuresis — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129

Neuroendocrinology — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307

Neuropeptide Y — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307 — Pharmacology of noradrenaline and neuropeptide tyrosine (NPY)-mediated sympathetic cotransmission, 373

Neuropeptides — Physiological basis for neuroimmunomodulation, 281

Neurotransmitter — Physiological basis for neuroimmunomodulation, 281

Neurotropin — Action of neurotropin on cold-induced pain in normal volunteers: a double-blind placebo study, 141

Neutrophils — Effects of low concentrations of arachidonic acid derived mediators on the membrane potential and respiratory burst responses of human neutrophils as assessed by flow cytometry, 65

Nipecotic acid binding — Alcohol and GABA: ethanol intake modifies hippocampal nipecotic acid binding in ethanol-preferring and non-preferring rats, 491

[^{3}H]6-Nitroquipazine-binding — Reduction of [^{3}H]6-Nitroquipazine-labelled 5-hydroxytryptamine uptake sites in rat brain by 3,4-Methylenedioxymethamphetamine, 635

Nomegestrol acetate — Kinetic analysis of the binding of nomegestrol acetate to the progesterone receptors in rat uterus by competition studies, 511

Noradrenaline — Electrotherapy in mice: dopaminergic and noradrenergic effects in the Tail Suspension Test, 39 — Pharmacology of noradrenaline and neuropeptide tyrosine (NPY)-mediated sympathetic cotransmission, 373

NSAIDs — Pharmacological aspects of chiral nonsteroidal anti-inflammatory drugs, 617

O

Oncogenes — Oncogenic proteins new targets for chemotherapeutic agents against cancer, 401

Open field — Effects induced by chronic treatment with selective D_1 or D_2 antagonists on open-field behavior and colonic temperature, 341

Orthostatic hypotension — Randomized double-blind trial of injectable heptaminol for controlling spontaneous of bromocriptine-induced orthostatic hypotension in parkinsonians, 695

Oxotremorine — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49

P

Paf-acether — Inhibition of human and rabbit platelet activation by Ketotifen, 1

Papillary muscles — Whether phenylephrine exerts inotropic effects through α- or β-adrenoceptors depends upon the relative receptor populations, 25

Parkinson's disease — Randomized double-blind trial of injectable heptaminol for controlling spontaneous of bromocriptine-induced orthostatic hypotension in parkinsonians, 695

Pergolide — Effect of bromocriptine on neurogenic vasoconstriction in the isolated autoperfused hindquarters of the rat, 539

Perindopril — Pharmacokinetics of perindopril and its metabolites in healthy volunteers, 175

Perphenazine levels — Time-related changes in serum perphenazine, striatal ^{3}H-spiperone binding and regional

brain acid metabolites of dopamine and 5-hydroxy-tryptamine after a single dose of perphenazine, 213

Pharmacodynamics — Pharmacodynamics of CY 216 in healthy volunteers: inter-individual variations, 17

Pharmacokinetics — Pharmacokinetics of flunitrazepam following single dose oral administration in liver disease patients compared with healthy volunteers, 643 — Tianeptine and its main metabolite. Disposition in chronic renal failure and haemodialysis, 663

Pharmacology — Abstracts, Meeting of the French *Association des Pharmacologistes* (Besançon, 19-20 October 1989), 423 — Abstracts, Seminar of the French *Association des Pharmacologistes* of oral communications and posters (Paris, 15-16 March 1990), 559

Phenylephrine — Whether phenylephrine exerts inotropic effects through α- or β-adrenoceptors depends upon the relative receptor populations, 25

Pituitary — Neuropeptide Y: localization in the central nervous system and neuroendocrine functions, 307

Placebo — Effects of Jian Bu Wan – a traditional Chinese medication on behavioral and cardiovascular parameters after acute alcohol intake in normal subjects, 11

Plasma binding — How chronically administered valproate increases chlordiazepoxide transfer through the blood–brain barrier, 105

Plasma levels — Pharmacokinetics of flunitrazepam following single dose oral administration in liver disease patients compared with healthy volunteers, 643

Platelet activation — Inhibition of human and rabbit platelet activation by Ketotifen, 1

Progestins — Kinetic analysis of the binding of nomegestrol acetate to the progesterone receptors in rat uterus by competition studies, 511

Prostaglandins — Effects of low concentrations of arachidonic acid derived mediators on the membrane potential and respiratory burst responses of human neutrophils as assessed by flow cytometry, 65

Protein kinases — Oncogenic proteins new targets for chemotherapeutic agents against cancer, 401

Psychomotor performance — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

Psychomotor tests — A comparative study of cyproheptadine and DL carnitine on psychomotor performance and memory in healthy volunteers, 191

Psychopharmacological tests — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49

Pulsed Doppler — Influence of diuretics on brachial artery diameter and distensibility in hypertensive patients, 685

Push-pull perfusion — Determination of cerebrospinal fluid production rate using a push-pull perfusion procedure in the conscious rat, 269

Pyroglutamic acid — Pyroglutamic acid improves the age associated memory impairment, 169

Q

Quazepam — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

R

Ras — Oncogenic proteins new targets for chemotherapeutic agents against cancer, 401

Rat brain — Reduction of [^{3}H]6-Nitroquipazine-labelled 5-hydroxytryptamine uptake sites in rat brain by 3,4-Methylenedioxymethamphetamine, 635

Rats — Influence of acetaminophen on antipyrine kinetics in rats, 79 — Tissue distribution of dextromoramide in the rat, 163

Receptors — Selective agonists of tachykinin binding sites, 257

Release of norepinephrine — Effects of CRL 41034 on the adrenergic neuroeffector interaction in the canine saphenous vein, 525

Renal failure — Tianeptine and its main metabolite. Disposition in chronic renal failure and haemodialysis, 663

Renin — Randomized double-blind trial of injectable heptaminol for controlling spontaneous or bromocriptine-induced orthostatic hypotension in parkinsonians, 695

Reperfusion — Oxygen-derived free radicals and postischemic myocardial reperfusion: therapeutic implications, 85

Reserpine — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49

S

Saccades — The effects of alprazolam, quazepam and diazepam on saccadic eye movements, parameters of psychomotor function and the EEG, 653

Salicylate metabolism — Sex differences in salicylic acid metabolism in streptozotocin induced diabetes in rats, 483

Salicylglucuronic acid — Sex differences in salicylic acid metabolism in streptozotocin induced diabetes in rats, 483

Salicyluric acid — Sex differences in salicylic acid metabolism in streptozotocin induced diabetes in rats, 483

Seminar — Abstracts, Meeting of the French *Association des Pharmacologistes* (Besançon, 19-20 October 1989), 423 — Abstracts, Seminar of the French *Association des Pharmacologistes* of oral communications and posters (Paris, 15-16 March 1990), 559

Sodium depletion — Hemodynamic and cardiac effects of spiraprilat in normal and sodium depleted conscious dogs, 547

Sparteine — Genetic polymorphisms of drug metabolism, 595

Spiperone binding — Time-related changes in serum perphenazine, striatal ^{3}H-spiperone binding and regional brain acid metabolites of dopamine and 5-hydroxy-tryptamine after a single dose of perphenazine, 213

Spiraprilat — Hemodynamic and cardiac effects of spiraprilat in normal and sodium depleted conscious dogs, 547

Streptozotocin-induced diabetes — Sex differences in salicylic acid metabolism in streptozotocin induced diabetes in rats, 483

Subtypes of alpha adrenergic receptors — Effects of CRL 41034 on the adrenergic neuroeffector interaction in the canine saphenous vein, 525

Sulfamethazine — Genetic polymorphisms of drug metabolism, 595

Sympathetic — Pharmacology of noradrenaline and neuropeptide tyrosine (NPY)-mediated sympathetic cotransmission, 373

Sympathetic nervous system — Effects of dextronatrin on blood pressure, hematocrit, urinary sodium excretion and sympathetic nerve activity of rats, 129

T

Tachykinins — Selective agonists of tachykinin binding sites, 257

Tail Suspension Test (TST) — Electrotherapy in mice: dopaminergic and noradrenergic effects in the Tail Suspension Test, 39

Therapeutic target — Oncogenic proteins new targets for chemotherapeutic agents against cancer, 401

Tianeptine — The pharmacokinetics of the antidepressant tianeptine and its main metabolite in healthy humans — influence of alcohol co-administration, 115 — Tianeptine and its main metabolite. Disposition in chronic renal failure and haemodialysis, 663

Tissue distribution — Tissue distribution of dextromoramide in the rat, 163

U - V - W

Uterus — Kinetic analysis of the binding of nomegestrol acetate to the progesterone receptors in rat uterus by competition studies, 511

Valproate — How chronically administered valproate increases chlordiazepoxide transfer through the blood–brain barrier, 105

Ventricular fibrillation — Investigations of the antifibrillatory activity of flunarizine and lidoflazine in isolated hearts of rabbits and guinea pigs, 503

Virus — Perspectives in antiviral chemotherapy, 357

Yohimbine — Is it possible to predict the activity of a new antidepressant in animals with simple psychopharmacological tests? 49
